TBD <b>After COVID19 restrictions are lifted</b>	(GLP) Take MPP to Work Day	15-20	Organizing a visit from MPP Ian Arthur to the Bombardier Plant in Kingston.	To build a better relationship with the local MPP and show them what an engineer does for the community.
TBD after COVID-19 restrictions are lifted and the community feels comfortable with gathering in	(EDU) Student Papers Night	~15	Queen's University and the Royal Military College of Ontario are hosting a Student's Papers Night where student teams are encouraged to submit papers and present their topic in front of a judging panel. \$400 will be awarded for first place, \$300 for second, \$150 for third, and \$75 will be awarded to each team of two as a consolation prize.	PEO Kingston members will be reviewing paper submissions and judging the presentations. This is an opportunity for chapter members to make connections with students enrolled in engineering at Queen's and RMC and encourage students to follow-through with pursuing an engineering career following graduation.

TBD After the COVID-19 restrictions are lifted and the community feels comfortable with gathering in-person	<b>(EDU)</b> Popsicle Stick Bridge Busting Competition	~35	The goal of the contest is to construct the strongest bridge possible using only 100 popsicle sticks and glue. The bridge must span a gap of 500mm, and a matchbox type car must be able to traverse the bridge on a construction paper deck.	Elementary students from local schools will be invited to attend. Parent and children groups on Facebook will be advised of the event, along with the local Boys and Girls Club, libraries, private schools, Scouts, and members via an e-mail blast. Participants will have fun and learn about structural engineering while building their bridge, and will be thrilled to see how their bridge fares while enduring the bridge busting apparatus.
Initial start was second week of April – to be restarted in September.	<b>(LAP)</b> Orientation	~24	The PEO Licensure Assistance Program (LAP) gives the opportunity for experienced licensed professionals to transfer their skills and knowledge to aspiring EITs pursuing their engineering licence. The orientation was to be the initial meeting for the pairing and to provide the guidelines and expectations.	The 6 month program connects PEO members with EIT's to assist and provide support as they progress towards obtaining their professional engineering licence. The goal is that this program will equip new engineers with a greater understanding of their roles and responsibilities and for success in their chosen profession. Program was to start in April but was shelved due to COVID-19 restrictions. We will attempt to restart in September after consulting with head office (Tracey Caruana). York region is attempting to run the process virtually via Adobe Connect in June and we will follow up to get feedback on the process

**CHAPTER FOCUS FOR THE NEXT 3-4 MONTHS** (List the one key concern of the chapter, its main area of focus, such as, building membership, improving success of events, expanding events to include younger members, building stronger relationships with the local community, including the government, the schools, the universities, etc.)

The Kingston Chapter Focus will be to continuing maintaining regular Executive Communications through our Monthly Virtual Executive Zoom Meetings. We want to be prepared to act on our plans once the COVID-19 restrictions are lifted. The Communications Committee is in the process organizing their work responsibilities to cover the chapter's future needs.
